

## **5015 – Invest in the oil business**

Peace Oil is produced as a result of Arabs, Jews, Bedouin and Druze working together. All communities participate in the growing and pressing of the olives, as well as the bottling and marketing of the oil. The goal of the Peace Oil initiative is to improve racial relations and encourage lasting friendships between workers of all backgrounds. Furthermore, through making the Peace Oil scheme a success, we aim to show that such a project can bring economic prosperity and therefore to encourage other similar enterprises. Profits from Peace Oil are used to support peace and reconciliation work in the Middle East.

Peace Oil is produced using Suria variety olives, grown in the foothills of the Carmel Mountains. They are grown organically, although they do not have organic certification because of non-organic farming neighbours. Next year Peace Oil will also be offering oil with organic certification. Peace Oil is not produced in bulk and is the equivalent of a fine, estate-bottled wine.
